**Year-end standings calculations**

There were 10 series events during the 2010 season. The final point standings will be calculated as follows:

- The “Pro ” class will count the total number of Series events minus two.
- All other classes listed above will count the total number of Series events divided by two plus one (Rounded Up). i.e.  $10/2+1=6$ .
- Riders cannot ride all 10 series events for points. If a rider does their highest scoring event will be thrown out.
- Riders must sit one out or declare it as an exhibition ride before riding the event.
